

MSP 4741: Emergent Media Production (Zaylea)

MSP 8741: Cybermedia Workshop (Zaylea)

In collaboration with MSP 4446: Psychological Processing of Media (Lombard)

Project #2: 360° Video - Building Blocks (Learning the Language of 360° Video)

Personal journal questions for MSP 4446:

Please send your 1-page responses to these questions in an email attachment to lombard@temple.edu by **Friday October 5 at 5 pm.**

- 1) Which of the five video/questions groups were you in?
- 2) What was the experience of working with your group like?
 - a) Was there communication about what the students in the other class were planning and producing? If you know, what strategies did the group use to create spatial presence and the second type of presence with the video? If you know, what went well and what didn't work during the filming?
 - b) How did your PPM group approach designing the questions to measure responses to the video? What was new / interesting / challenging / etc. about the process?
- 3) What do you think about how the videos (the one by your group and any others you want to comment on) came out? What psychological and physiological responses did you have during viewing? How would you improve the video(s)?
- 4) What do you think about how the online questionnaire came out? Do you think it measures the responses we intended? How would you improve it?
- 5) Team evaluation: Did everyone in your PPM group contribute? What was the group dynamic like?

PLEASE NOTE THAT THE JOURNAL IS NOT PRIVATE: Quotes from our journal entries may be shared with MSP 4741/8741/4446, with names attached. If you do not want your answers shared in this way, that's fine – just specify this at the top of your journal. This applies to questions 1-4; teammate evaluations are always private.
